

How does VISMED® MULTI help relieve dry eye?

VISMED® MULTI is a patented lubricant eye drop formulation carefully designed to immediately relieve sensations of dry or irritated eyes. It efficiently protects the ocular surface and restores natural balance of tears over time.

Hyaluronic acid

- > Biopolymer naturally present in the human body, including the eye
- > Excellent lubricating and viscoelastic properties, similar to those of natural tear film, for a long-lasting protection
- > High water binding capacity to reduce tear evaporation and prolong wetting effect over time

Balanced formulation

- > Relief from osmotic cellular stress reducing cell desiccation (osmoprotection)
- > Restoration of the natural balance of tears

Essential ions

- > Calcium, magnesium and potassium ions for their role in the maintenance of a healthy eye
- > Concentrations similar to those of natural tears

Preservative-free

- > No addition of preservatives which would be a source of toxic or allergic reactions, irritation and worsening of the symptoms
- > Ideal for long-term use and contact lens wear

VISMED® MULTI combines many essential properties of an excellent eye lubricant.

Offer your eyes an unmatched combination of long-lasting relief and comfort.

- ✓ Effective
- ✓ Safe
- ✓ Economic
- ✓ Easy to use

- > VISMED® MULTI is available in a 10 ml intuitive preservative-free squeezable multidose dispenser.
- > VISMED® MULTI can be used with all types of contact lenses during wear.

Why do my eyes feel dry or irritated?

Symptoms of dry eye are usually caused by the association of different factors:

ENVIRONMENTAL FACTORS

- > air conditioning
- > dry, hot or windy surroundings
- > polluted, dusty or smoky air
- > bright light

HUMAN FACTORS

- > extended computer screen use
- > contact lens wear
- > aging
- > medicine intake
- > eye surgery

These factors cause the thin tear film covering the delicate eye surface to become unstable, break-up and evaporate more quickly than normal, leaving parts of the ocular surface uncovered by the tear film, resulting in symptoms of dry eye.

WHAT ARE THE SYMPTOMS OF DRY EYE?

Dry eye is a complex disease associated with various symptoms such as sensations of ocular dryness, irritation, burning, itching, tiredness, foreign body sensation, photosensitivity, blurred vision, excessive tearing or pain.

HOW CAN I GET RELIEF FROM THESE SYMPTOMS?

The use of high quality lubricant eye drops based on hyaluronic acid will restore the natural hydration, lubrication and protection properties of the tear film, relieve symptoms of dry eye and increase patient comfort.

**Lubricant eye drops
help relieve dry eye symptoms.**

New intuitive **preservative-free** multidose dispenser

Just squeeze!

Effective

- > Highly effective in relieving sensations of ocular dryness
- > Long-lasting protective coating of the ocular surface
- > Essential ions calcium, magnesium and potassium in concentrations similar to those of natural tears
- > Osmoprotection to limit water loss at cellular level

Safe

- > Sterile and preservative-free solution
- > Air filtering system against microbial contamination
- > Hyaluronic acid of non-animal origin

Economic

- > 10 ml multidose container for more than 250 drops
- > Sterile for up to 3 months after first use

Easy to use

- > Intuitive, precise and reproducible drop delivery system
- > Easily squeezable soft polymer container
- > Compact size design

**Sterile,
preservative-free solution**

**Easily squeezable
